Project Description Generator

Description: Generates a project description in real time as a client fills out a new request. The AI writes a clear, professional description based on the title and category entered by the client.

Page

/client-overview/create-request

Socket Event

ai:generate_description

Request

```
{
  "title": "Mobile Inventory Management Application",
  "category": "Application Development"
}
```

Response

The response is streamed using the following events.

Description Chunk

ai:description_chunk

```
{
  "event": "ai:description_chunk",
  "chunk": "Generated project description..."
}
```

Generation Complete

ai:description_complete

```
{
  "event": "ai:description_complete"
}
```

Error Response

ai:description_error

```
{
  "event": "ai:description_error",
  "message": "Unable to generate the description."
}
```

Request Draft Suggestions

Description: Suggests a complete draft for a client's project request, including title, description, sub-specialties, budget range and estimated duration based on the information already entered by the client.

Page

/client-overview/create-request

Endpoint

POST /api/client/requests/ai-suggest

Request

```
{
  "title": "E-commerce Website",
  "description": "I need a complete e-commerce platform",
  "specialtyName": "Web Development"
}
```

Response

```
{
  "success": true,
  "data": {
    "suggestedTitle": "Complete E-commerce Platform",
    "suggestedDescription": "...",
    "suggestedSubSpecialties": [
      "React",
      "Node.js"
    ],
    "recommendedMinBudget": 5000,
    "recommendedMaxBudget": 12000,
    "suggestedDurationDays": 30,
    "complexityRating": "Medium",
    "personalizedNote": "...",
    "aiMatchScoreEstimate": 82
  }
}
```

Milestone Suggestions

Description: Generates a suggested milestone breakdown for a new project, including milestone titles, descriptions, duration and payment percentages.

Page

/provider-overview

Endpoint

POST /api/ai-review/suggest-milestones

Request

```
{
  "title": "Complete Brand Identity Design",
  "description": "Create a complete visual identity for a startup",
  "totalAmount": 3000
}
```

Response

```
{
  "success": true,
  "data": {
    "milestones": [
      {
        "title": "Initial Logo Design",
        "description": "...",
        "days": 5,
        "percentage": 30
      },
      {
        "title": "Complete Visual Identity",
        "description": "...",
        "days": 10,
        "percentage": 70
      }
    ]
  }
}
```

Project Plan Analysis

Description: Analyzes a complete project or business-model draft and returns a quality review including clarity, feasibility, market fit, strengths, risks and pricing recommendations.

Page

/provider-overview

Endpoint

POST /api/ai-review/analyze

Request

```
{
  "title": "Digital Marketing Consulting",
  "description": "Digital marketing consulting for startups"
}
```

Response

```
{
  "success": true,
  "data": {
    "clarityScore": 85,
    "feasibilityScore": 78,
    "marketFitRating": "Good",
    "executiveSummary": "...",
    "strengths": ["..."],
    "gapsAndRisks": ["..."],
    "recommendedImprovements": ["..."],
    "suggestedPricingStrategy": "..."
  }
}
```

Live Text Suggestion and Enhancement

Description: Streams AI-generated or AI-enhanced text into project descriptions and proposal fields while the provider is working.

Page

/provider-overview

Socket Events

stream_ai_suggest_text

stream_ai_enhance_description

Request

```
{
  "title": "API Development"
}
```

Response

Text is returned progressively as streamed chunks over the active socket connection until generation is complete.

Specialty Portfolio AI Review

Description: Reviews a provider's uploaded work samples for a selected specialty and evaluates quality, feasibility, clarity and ownership credibility.

Page

/provider-overview/profile/specialties

Endpoint

POST /api/provider/specialties/:id/ai-evaluate

Request

No request body is required. The endpoint evaluates the work samples already uploaded for the selected specialty.

Response

```
{
  "success": true,
  "data": {
    "status": "TEST_REQUIRED",
    "scores": {
      "aiScore": 82,
      "feasibilityScore": 75,
      "clarityScore": 88,
      "ownershipCredibility": 90
    },
    "feedback": {
      "summary": "...",
      "strengths": ["..."],
```

```
      "warnings": ["..."],
      "corrections": ["..."]
    }
  }
}
```

Accreditation AI Evaluation

Description: Evaluates a provider's accreditation sample and returns an AI score, quality rating and written feedback.

Page

/provider-overview/business-models/accreditation/new

Endpoint

POST /api/provider/accreditation/submit

Request

The request is sent as multipart form data and may include project files.

```
{
  "providerSpecialtyId": "spec-uuid",
  "title": "Inventory Management System",
  "description": "...",
  "technologiesUsed": [
    "Angular",
    "NestJS"
  ],
  "projectUrl": "https://example.com",
  "githubUrl": "https://github.com/example/repo"
}
```

Response

```
{
  "success": true,
  "data": {
    "sample": {
      "id": "sample-uuid",
      "status": "AI_VERIFIED"
    },
    "evaluation": {
      "aiScore": 88,
      "status": "AI_VERIFIED",
      "aiQualityRating": "Excellent",
      "feedbackAr": "...",
      "strengths": ["..."],
      "recommendations": ["..."]
    }
  }
}
```

Skill Assessment

Description: Generates a technical assessment tailored to a provider's specialty and evaluates the submitted answers.

Page

/provider-overview/profile/specialties

Generate Assessment

POST /api/assessments/generate

Real-time socket variant:

start_assessment

Request

```
{
  "providerSpecialtyId": "spec-uuid"
}
```

Response

```
{
  "success": true,
  "data": {
    "attemptId": "attempt-uuid",
    "questions": [
      {
        "id": 1,
        "textAr": "...",
        "options": [
          {
            "id": "a",
            "text": "..."
          },
          {
            "id": "b",
            "text": "..."
          }
        ]
      }
    ],
    "timeLimitMinutes": 15,
    "generationSource": "GEMINI"
  }
}
```

Generation Error

```
{
  "success": false,
  "code": "GENERATION_IN_PROGRESS",
  "message": "Assessment generation is already in progress."
}
```

Submit Assessment

POST /api/assessments/:attemptId/submit

Real-time socket variant:

submit_answer

Request

```
{
  "submittedAnswers": {
    "1": "b",
    "2": "a"
  }
}
```

Response

```
{
  "success": true,
  "data": {
    "attemptId": "attempt-uuid",
    "score": 85,
    "isPassed": true,
    "status": "COMPLETED",
    "feedbackAr": "...",
    "strengths": ["..."],
    "weaknesses": ["..."],
    "completedAt": "2026-09-27T10:00:00.000Z"
  }
}
```

Error Response

```
{
  "message": "Assessment already finalized.",
  "code": "ALREADY_FINALIZED"
}
```

Possible error codes:

- AUTH_REQUIRED
- INVALID_REQUEST
- RATE_LIMITED
- NOT_FOUND
- ALREADY_FINALIZED
- SUBMISSION_FAILED

Onboarding Calibration Quiz

Description: Generates a short AI-assisted onboarding quiz used to estimate the provider's general skill level.

Page

/provider-overview/profile/setup

Socket Events

setup_test:init

setup_test:answer

Request

```
{
  "questionId": "q1",
  "answerIndex": 2
}
```

Response Event

setup_test:result

```
{
  "event": "setup_test:result",
  "score": 8,
  "total": 10,
  "correct": 8,
  "message": "..."
}
```

Proposal Suggestions

Description: Suggests an improved proposal title and message, recommended price range, quality score and provider advantages before submission.

Page

/provider-overview/explore-requests/:id/apply

Endpoint

POST /api/proposals/ai-suggest

Request

```
{
  "projectId": "project-uuid",
  "currentTitle": "Website Development Proposal",
  "currentMessage": "..."
}
```

Response

```
{
  "success": true,
  "data": {
    "suggestedTitle": "...",
    "suggestedMessage": "...",
    "qualityScore": 78,
    "qualityTag": "Good",
    "priceAudit": {
      "recommendedMin": 2000,
      "recommendedMax": 3500,
      "priceTag": "Suitable",
```

```
      "justification": "..."
    },
    "suggestedAdvantages": ["..."]
  }
}
```

Proposal AI Audit

Description: Compares the client request, provider profile and project information to produce compatibility metrics before proposal submission.

Page

/provider-overview/explore-requests/:id/apply

Socket Event

trigger_ai_audit

Request

```
{
  "providerId": "provider-uuid",
  "projectId": "project-uuid"
}
```

Response Event

ai_audit_result

```
{
  "event": "ai_audit_result",
  "profileAudit": ["..."],
  "triPartyComparison": "...",
  "finalMetrics": {
    "compatibilityScore": 80
  },
  "acceptanceOdds": 65
}
```

Proposal Submission

Description: Submits the provider's final proposal and enriches it with AI-generated matching, quality, pricing and feedback information.

Page

/provider-overview/explore-requests/:id/apply

Endpoint

POST /api/projects/:id/proposals

Request

```
{
  "title": "Application Development Proposal",
  "message": "...",
  "totalPrice": 5000,
  "deliveryDays": 30,
  "milestones": [
    {
      "stepOrder": 1,
      "title": "Design",
      "description": "...",
      "days": 10,
      "percentage": 40,
      "amount": 2000
    }
  ],
  "agreedToTerms": true,
  "agreedToEscrow": true
}
```

Response

```
{
  "success": true,
  "data": {
    "id": "proposal-uuid",
    "aiMatchScore": 82,
    "aiQualityTag": "Excellent",
    "aiPriceTag": "Suitable",
    "aiFeedback": {
      "summary": "..."
    }
  }
}
```

Provider Matching

Description: Finds and ranks the top matching open projects for a provider based on skills and profile information.

Page

/provider-overview

Endpoint

GET /api/provider/statistics

Response

```
{
  "success": true,
  "data": {
    "aiMatchingProjects": [
      {
        "projectId": "project-uuid",
        "aiMatchScore": 91,
        "matchReasons": ["..."],
```

```
        "generationSource": "GEMINI"
      }
    ],
    "summary": {
      "aiRating": 4.6
    }
  }
}
```

Project Fit Analysis

Description: Provides a detailed analysis of how well a provider matches a specific project, including match percentage, winning strategy, suggested bid price and risk factors.

Page

/provider-overview/explore-requests

Endpoint

GET /api/assistant/analyze-project/:projectId

Response

```
{
  "success": true,
  "data": {
    "matchPercent": 87,
    "matchSummary": "...",
    "winningStrategy": ["..."],
    "suggestedBidPrice": 4500,
    "priceRationale": "...",
    "riskAssessment": "..."
  }
}
```

Marketplace Recommendations

Description: Returns AI-ranked service recommendations for marketplace searches based on the user's query and selected category.

Page

/marketplace

Endpoint

POST /api/marketplace/ai-recommendations

Request

```
{
  "query": "Logo Design",
  "limit": 6
}
```

Response

```
{
  "success": true,
  "data": {
    "items": [
      {
        "id": "service-uuid",
        "title": "...",
        "generationSource": "GEMINI"
      }
    ]
  }
}
```

Public Profile AI Performance Metrics

Description: Returns AI-scored performance metrics for a provider's public profile based on project history and client reviews.

Endpoint

GET /api/provider/profile/public/:providerId

Response

```
{
  "success": true,
  "data": {
    "executionQuality": 88,
    "onTimeDelivery": 92,
    "communication": 85,
    "clientSatisfaction": 90,
    "onTimeCompletionRate": 95,
    "repeatClientRate": 40,
    "highRatingServicesRate": 80,
    "conflictFreeDeliveryRate": 100
  }
}
```

Bio and Skills Suggestions

Description: Generates a professional provider biography and relevant skill suggestions based on the provider's existing profile information.

Endpoints

POST /api/provider/profile/suggest-bio

POST /api/provider/profile/suggest-skills

Bio Response

```
{
  "success": true,
  "data": {
    "suggestedBio": "..."
  }
}
```

Skills Response

```
{
  "success": true,
  "data": {
    "suggestedSkills": [
      "Angular",
      "Node.js"
    ]
  }
}
```

Project Health Analysis

Description: Generates an on-demand health and risk analysis for an active project, including confidence, risk level and key observations.

Pages

/provider-overview/projects/active/progress/:id

/client-overview/projects/:id

Endpoints

POST /api/provider/projects/:id/health

POST /api/client/requests/:id/health

Response

```
{
  "success": true,
  "data": {
    "confidence": 78,
    "riskLevel": "Low",
    "riskLevelKey": "LOW",
    "healthRating": "Good",
    "bullets": ["..."],
    "earlyDays": 2,
    "matchPercentage": 85
  }
}
```

Delivery AI Review

Description: Reviews a provider's submitted work for a project stage and returns a summary, aligned points, potential gaps and questions for the client.

Page

/client-overview/projects/:id/delivery-review/:stageId

Endpoint

POST /api/client/requests/:id/stages/:stageId/ai-review

Response

```
{
  "success": true,
  "data": {
    "summary": "...",
    "alignedPoints": ["..."],
    "potentialGaps": ["..."],
    "questionsForReviewer": ["..."]
  }
}
```

Dispute AI Summary

Description: Generates a structured summary of a dispute between a client and provider to help an administrator review the case.

Endpoint

POST /api/admin/disputes/:id/ai-summary

Response

```
{
  "success": true,
  "data": {
    "summary": "...",
    "clientPerspective": "...",
    "providerPerspective": "...",
    "recommendation": "..."
  }
}
```

Help Assistant Chat

Description: Provides a conversational assistant that answers client questions about platform functionality such as requests, payments and escrow.

Page

/client-overview/help/ai-assistant

Socket Event

help:ask

Request

```
{
  "question": "How does escrow work?",
  "history": []
}
```

Response Events

help:answer_start

help:answer_chunk

help:answer_complete

Error Event

help:error

```
{
  "event": "help:error",
  "message": "...",
  "humanSupportFallback": true
}
```
